

# UNIVERSITY OF OSLO

## Module I: Introduction to research data management

**Matthew Good, Igor Goncharenko, Agata Bochynska,  
Kirsten Borse Haraldsen, Elin Stangeland**

October 12, 2021

## Agenda

- A bit of context
- What is research data management?
- UiO and funder requirements
- Aspects of research data management

# Rules for today

- Interrupt me if I speak too fast!
- Feel free to write your questions in the chat, we will answer them at the end of the session
- We will be using menti.com – Go to menti.com and use code **4700 2819**

# Menti – Go to [menti.com](https://menti.com) and use code 4700 2819

- Which faculty or department do you work in?

# A bit of context

# Open Research / Open Science

“Open science means transparency and knowledge-sharing in research processes to make knowledge accessible across academic groups, sectors and national boundaries. The concept of open science encompasses the entire research process [...]”

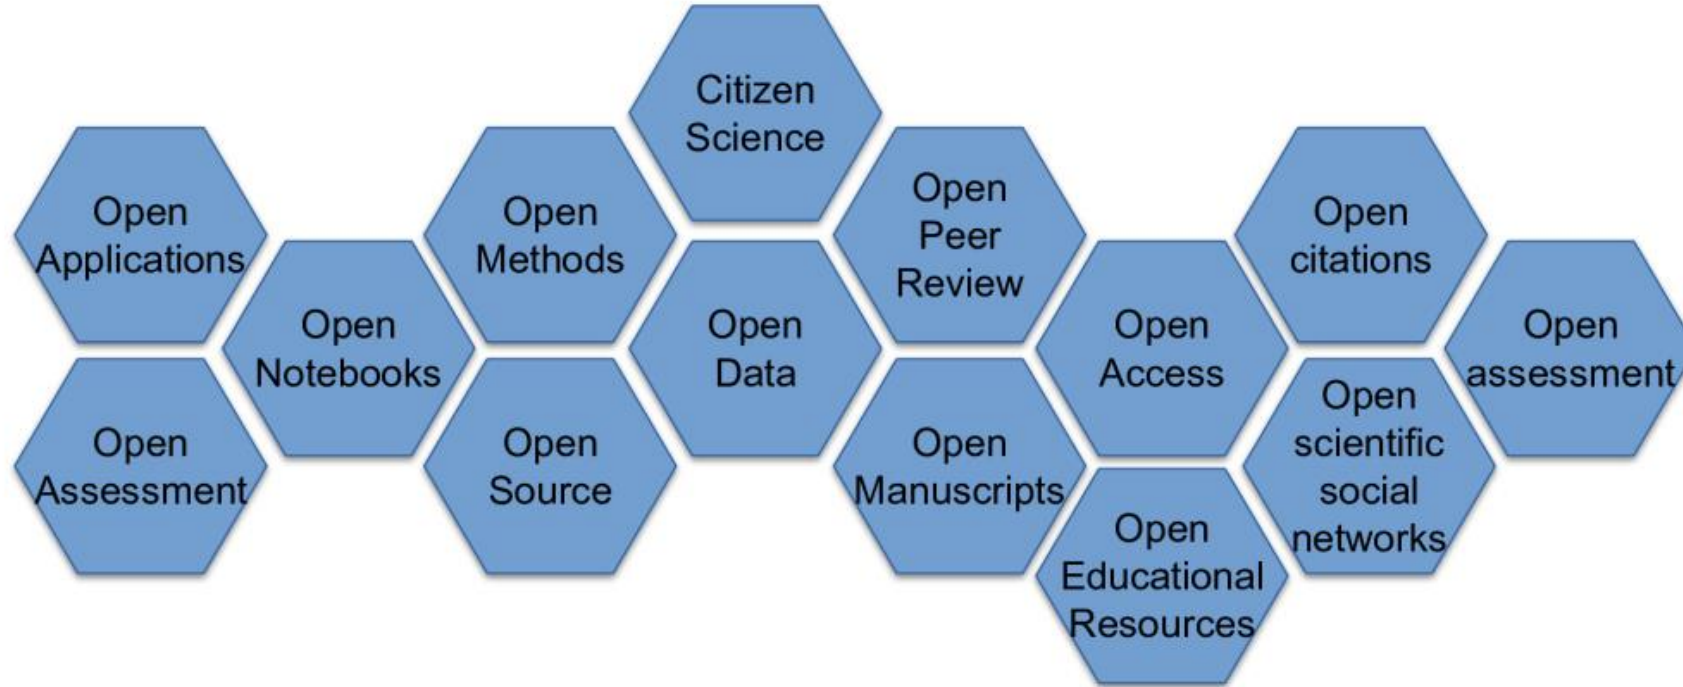

# Internationally supported

“**Open Science** is becoming the modus operandi for carrying out research and innovation by **sharing knowledge, data and tools** as early as possible, in open collaboration with all relevant knowledge actors and society.”

[ec\\_rtd\\_horizon-europe-strategic-plan-2021-24.pdf](https://ec.rtd.horizon-europe-strategic-plan-2021-24.pdf) (europa.eu)

# Open science includes

# Why open science?

- Transparency
- Knowledge sharing
- Better validation and reproducibility
- Reduce academic misconduct
- Increased quality and impact
- Foundations for others to build upon
- Demanded by funders...

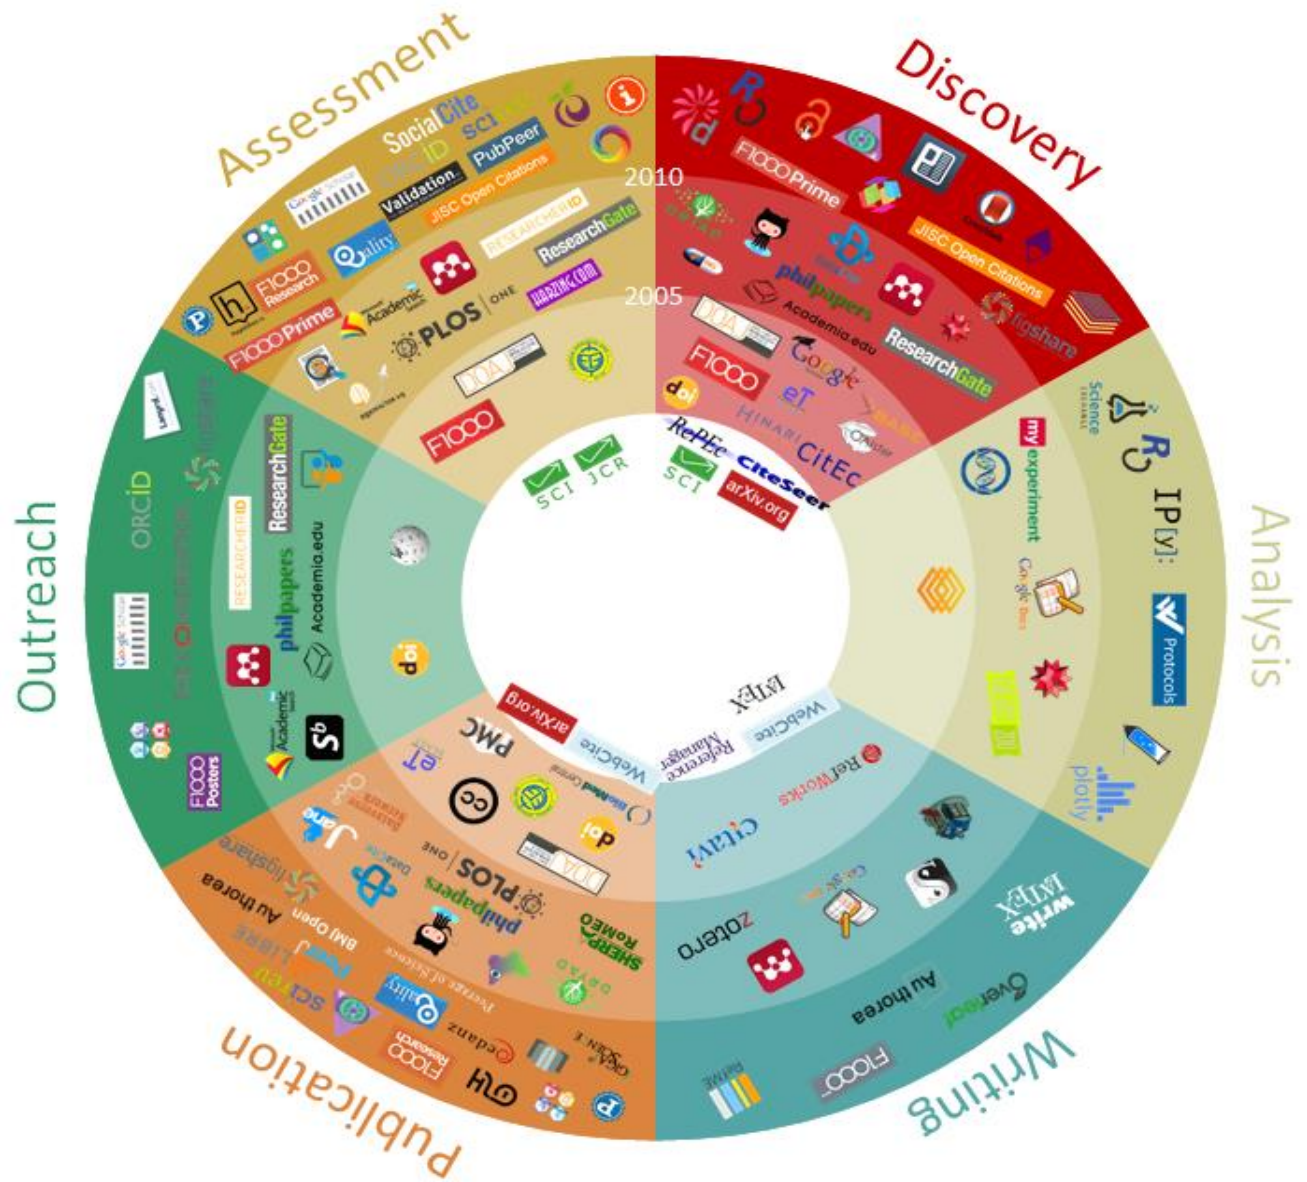

RITMO / Centre for  
Interdisciplinary Studies in  
Rhythm, Time and Motion

*“My main argument for opening all parts of the process is that it is “sharpening” the research process. You cannot be sloppy if you know that it will be exposed”.*

Alexander R. Jensenius, 2020

# What is research data management?

# A Definition

*"Research data management concerns the organization of data, from its entry to the research cycle through to the dissemination and archiving of valuable results. It aims to ensure reliable verification of results and permits new and innovative research built on existing information."*

Whyte, A., Tedds, J. (2011)

## **Menti – Go to [menti.com](https://menti.com) and use code 4700 2819**

- What kind of research data are you working with?
- What kind of problems have you had working with your data?

# What is research data?

*Research data are representations of observations, objects, or other entities used as evidence of phenomena for the purposes of research or scholarship.*

Borgman, C. L. (2015)

## **Observational data**

results from recognising, noting, or recording facts or occurrences of phenomena

## **Computational data**

products of executing computer models, simulations, or workflows

## **Experimental data**

results of procedures in controlled conditions to test or establish hypotheses or to discover or test new laws

## **Records**

records of almost any phenomenon or human activity, can be treated as data for research

# Why is research data management (RDM) important?

- Efficiency
- Awareness of requirements
- Policies, regulations, and where to find support and help
- Quality, credibility and reproducibility
- Sharing and transparency

# Save time!

# Transparency

"When the researchers published their 2020 update, they posted the data from their 2012 paper for the first time. Publicly sharing data was once a rarity in science but is slowly becoming more commonplace amid calls for greater transparency."

SCIENCE

## A Famous Honesty Researcher Is Retracting A Study Over Fake Data

Renowned psychologist Dan Ariely literally wrote the book on dishonesty. Now some are questioning whether the scientist himself is being dishonest.

Stephanie M. Lee  
BuzzFeed News Reporter

Posted on August 20, 2021, at 2:40 p.m. ET

[Tweet](#) [Share](#) [Copy](#)

# Reproducibility

*"For my first work-related tweet of 2020, I am totally bummed to announce that we have retracted last year's paper on enzymatic synthesis of beta-lactams. The work has not been reproducible," she tweeted.*

*"It is painful to admit, but important to do so. I apologize to all. I was a bit busy when this was submitted and did not do my job well."*

The image is a screenshot of a BBC News article. At the top, there is a red navigation bar with the word "NEWS" in white. Below this, there are several menu items: "Home", "Video", "World", "UK", "Business", "Tech", "Science", "Stories", and "Entertainment & Arts". The article is categorized under "US & Canada". The main headline reads "Nobel Prize-winning scientist Frances Arnold retracts paper". Below the headline, it says "3 January 2020" and there are social media sharing icons for Facebook, WhatsApp, Twitter, Email, and a general "Share" button. A small tag "Nobel Prize" is visible. The main image shows Frances Arnold, a woman with blonde hair wearing a blue blazer, standing in a laboratory setting with various pieces of scientific equipment. A caption below the image reads "Prof Arnold works in the department of chemical engineering at Caltech". At the bottom of the image, there is a small logo for "MILLENNIUM PRIZE". Below the image, a text block states: "American scientist Frances Arnold, who won the Nobel Prize for chemistry, has retracted her latest paper."

# UiO and funder requirements

# Research data at UiO must:

- be made openly available for reuse
- have a **data management plan**
- have metadata
- be archived in a responsible manner
- be equipped with licenses for access, reuse and redistribution
- be made available as early as possible
- be made openly available, but costs for distribution can be covered

- Must assess the need to develop a data management plan in relation to all projects awarded funding. If you decide that a data management plan is not needed, you must provide an explanation.\*
- The **Data Management Plan (DMP)** must be delivered in connection with the revised grant application.
- RCN will request a final version of the data management plan in connection with the final report of the project.

*\*Research Council of Norway will soon require that all projects have a Data Management Plan*

HORIZON EUROPE

# Open Science across the programme

Open  
Science

Mainstreaming of open science practices for improved quality and efficiency of R&I, and active engagement of society

**Mandatory immediate Open Access to publications:** beneficiaries must retain sufficient IPRs to comply with open access requirements;

**Data sharing as 'open as possible, as closed as necessary':** mandatory **Data Management Plan** for FAIR (Findable, Accessible, Interoperable, Reusable) research data

- Work Programmes may incentivize or oblige to adhere to **open science practices** such as involvement of citizens, or to use the **European Open Science Cloud**
- Assessment of open science practices through the **award criteria** for proposal evaluation
- Dedicated support to **open science policy actions**
- **Open Research Europe** publishing platform

# The Data Management Plan (DMP)

- Is a living document that accompanies the research project;
- Specifies the kind of data that will be generated;
- Outlines how the data will be described;
- Explains where the data will be stored;
- Conveys whether and how the data can be shared.

## **Menti – Go to [menti.com](https://menti.com) and use code 4700 2819**

- On DMPs

# Contents of a Data Management Plan

- Types of data
- Collection and Analysis
- Storage
- Classification
- Organization
- Roles and Responsibilities
- Documentation and Metadata
- Long-term Storage and Archiving
- Sharing and Reuse
- Dissemination
- Legal and Ethical Requirements

# Plan vs. Planning

F  
Findable

A  
Accessible

I  
Interoperable

R  
Reusable

# Services and tools for RDM support:

- Research support and IT staff at your faculty/institute
- Subject librarian for your discipline
- [Research data management website](#)
- Digital Scholarship Center (DSC)
- Norwegian Centre for Research Data (NSD)

# Common questions we get

Privacy!!!!

Is this DMP good enough?

Where can I store (red, yellow, green) data?

What kind of archive should I use? Does UiO have an archive?

Metadata?!?!

[Norwegian version of this page](#)

Open Access

- Self-archiving
- Publishing deals and discounts
- Publish Open Access

# Open Access

It is the University of Oslo's goal that research results shall be openly available to individuals, the public sector, trade and industry, and the global research community.

## Publishing Open Access?

How do I publish Open Access, and how do I avoid fraud?

## Self-archiving

How to self-archive in DUO research archive via Cristin. Information on self archiving and other archives.

## Publishing deals and discounts

UiOs deals and discounts for Open Access publishing.

## Research Data Management

The UiO policy and guidelines. Help and advice on managing research data.

## Requirements for Open Access

## About Open Access

What is Open Access? Which advantages does it give you? The paths to Open Access.

## Journal Clubs

We now have journal clubs set up in many universities. Please use the search tool below to find out if there's one in your area:

🔍

## UiO

### Welcome

Our journal club is open to both staff and students at UiO across all departments. Everyone is welcome to join us - whether you are an enthusiast, a skeptic, or a cautious explorer. We plan to kick off our journal club in spring 2021. Feel free to get in touch if you are interested to participate or contribute!

### Our mission

- provide an informal and friendly platform for discussions about meta scientific topics
- help each other get familiarized with open science practices (e.g., pre-registrations, sharing data, sharing preprints, etc.)
- connect students and researchers from various disciplines who are interested in meta science.

# Carpentry: Training on foundational coding and data science skills

At University of Oslo (UiO), Carpentries workshops based on Software Carpentry, Data Carpentry, and Library Carpentry lessons are offered to facilitate sharing and re-using of code and data among graduates and researchers from all faculties and units.

## Upcoming workshops

Carpentry Workshop: Writing and Publishing on the Web Using Github

Published Nov. 3, 2021 10:00 AM

Data Carpentry for Social Sciences and Humanities Using R

Published Nov. 22, 2021 9:00 AM

## Upcoming sessions...

- Data Management Planning  
13/10 9:00-10:30
- Data Organization, Metadata and Documentation  
21/10 9:00-10:30
- Data Classification and Storage Selection  
22/10 9:00-10:30
- Sharing and Archiving Research Data  
26/10 9:00-10:30
- Data Discovery and Reuse  
27/10 9:00-10:30
